

Conditions for Admission to Study in Follow-up Master's Degree Study Programmes Implemented at the Faculty of Civil Engineering CTU in Prague in the 2024/2025 Academic Year

Part I Preamble

Pursuant to Art. 18 para. 4 of the Statute of the Faculty of Civil Engineering of the Czech Technical University in Prague, I hereby issue the following Conditions for Admission to Study in Follow-up Master's Degree Study Programmes Implemented at the Faculty of Civil Engineering CTU in Prague in the 2024/2025 Academic Year.

The admission of applicants to follow-up Master's degree study programmes is regulated by the following documents:

[Act No. 111/1998 Coll. on Higher Education Institutions](#) and on Amendments and Supplements to some other Acts as amended,

[The Statute of CTU in Prague](#),

these "Conditions for the Admission to Study in Follow-up Master's Degree Study Programmes Implemented at the Faculty of Civil Engineering CTU in Prague" and the Dean's Directive on "[Public Announcement of Admissions Proceedings to Follow-up Master's Degree Study Programmes Organised at the Faculty of Civil Engineering CTU in Prague in the 2024/2025 Academic Year](#)" (hereinafter "Dean's Directive").

This order lays out the conditions for the admission to study, the passing and content of the entrance examination, the highest numbers of students admitted to study in individual study programmes, the conditions for the recognition of the results of Bachelor's degree studies as the entrance examination results, the conditions for passing the entrance examination in the on-line format to the following follow-up Master's degree study programmes:

- Architecture and Building Sciences
- Buildings and Environment/Budovy a prostředí
- Buildings and Environment
- Civil Engineering
- Geodesy and Cartography
- Integral Safety of Constructions
- Intelligent Buildings
- Construction Management and Economics
- Civil Engineering – Structural and Transportation Engineering
- Civil Engineering – Materials and Diagnostics of Constructions
- Civil Engineering – Buildings
- Civil Engineering – Project Management

- Civil Engineering – Water Management and Water Structures
- Civil Engineering – Environment
- Building Engineering – Preparation, Erection and Operation of Constructions
- Water and Environmental Engineering

Part II

Art.1 Conditions for admission to study

1.1 Basic conditions for admission to study in Master's degree study programmes:

a. Successful completion of Bachelor's degree studies:

In the study programmes of

- Civil Engineering – Buildings
- Civil Engineering – Structural and Transportation Engineering
- Civil Engineering – Materials and Diagnostics of Constructions
- Civil Engineering – Project Management
- Civil Engineering – Water Management and Water Structures
- Civil Engineering – Environment
- Construction Management and Economics
- Integral Safety of Constructions
- Building Engineering – Preparation, Erection and Operation of Constructions
- Buildings and Environment/Budovy a prostředí
- Civil Engineering
- Buildings and Environment
- Water and Environmental Engineering

the condition is successful completion of a Bachelor's degree study programme oriented towards Civil Engineering, Architecture or Building Engineering.

In the study programme of

- Architecture and Building Sciences

the condition is successful completion of a Bachelor's degree study programme oriented primarily towards the field of Architecture and Urban Planning with minimally four courses of a "Studio" type as part of study where the study was completed by a Bachelor's thesis elaborated in the form of an architectural or urban planning study or a building project.

In the study programme of

- Geodesy and Cartography

the condition is successful completion of a Bachelor's degree study programme oriented towards Geodesy and Cartography, Geomatics or Geoinformatics.

In the study programme of

- Intelligent Buildings

the condition is successful completion of a Bachelor's degree study programme oriented towards Civil Engineering, Architecture, Mechanical or Electrical Engineering.

- Submission of a properly filled in application form by the 31st March 2024.
- Submission of enclosures to the application form as specified in the [Dean's Directive](#).
- Gaining the minimum number of points in the entrance examination pursuant to Art. 3.
- In the case of foreign nationals (excluding applicants from the Slovak Republic) applying for study in a study programme taught in Czech, certification of their readiness to study in Czech in one of the ways specified in the [Dean's Directive](#).
- In the case of applicants for study in a study programme taught in English, certification of their readiness to study in English in one of the ways specified in the [Dean's Directive](#).

1.2 The applicants who have complied with the conditions specified in Art. 1 para. 1.1 will be admitted to study at the Faculty of Civil Engineering CTU in Prague (hereinafter "FCE") in the order given by the total number of points obtained in the admissions proceedings pursuant to Art. 3 para. 3.2, maximally in numbers filling individual study programmes or specializations as specified in Art. 5 para. 5.1 to capacity. If more applicants occupy the last place based on the number of points specified in Art. 5 para. 5.1, all these applicants will be admitted.

Art.2 Passing and content of the entrance examination

2.1. In the study programmes of

- Civil Engineering – Buildings
- Civil Engineering – Structural and Transportation Engineering
- Civil Engineering – Materials and Diagnostics of Constructions
- Civil Engineering – Project Management
- Civil Engineering – Water Management and Water Structures
- Civil Engineering – Environment
- Construction Management and Economics

- Integral Safety of Constructions
- Building Engineering – Preparation, Erection and Operation of Constructions
- Buildings and Environment/Budovy a prostředí
- Intelligent Buildings
- Geodesy and Cartography
- Civil Engineering
- Buildings and Environment
- Water and Environmental Engineering

the entrance examination consists of a written test in branch-oriented thematic areas. General requirements for the examination are specified in the [Dean's Directive](#).

For the applicants who completed their studies in a related Bachelor's degree study programme at FCE in the 2023/2024 or 2022/2023 academic years pursuant to Art. 4, the results of their oral examinations in thematic areas of the final graduation examination will be recognised as the results of the entrance examination. The number of points from the entrance examination will be calculated as the average of the point evaluation of the examinations in thematic areas pursuant to Art. 3 para. 3.3.

2.2. In the study programme of

- Architecture and Building Sciences

the entrance examination consists of two parts:

1. oral part – an interview on architecture and architectural design of buildings, including the submission of a portfolio of architectural works;
2. written part – a test in technical design of buildings.

General requirements for the examination are specified in the [Dean's Directive](#).

For the applicants for the study programme of Architecture and Building Sciences who completed their studies by the defence of a Bachelor's thesis registered at the Department of Architecture FCE (K129) or at the Department of Urban Design, Town and Regional Planning FCE (K127) in the 2023/2024 or 2022/2023 academic years, the overall results of the final graduation examination will be recognised as the results of the entrance examination. The number of points from the entrance examination will be calculated as the point evaluation of the resulting mark for the final graduation examination pursuant to Art. 3 para. 3.3.

Art. 3 Numbers of points from the entrance examination

3.1. The minimum number of points from the entrance examination necessary for the admission to study:

- a. In the study programmes of
 - Civil Engineering – Buildings
 - Civil Engineering – Structural and Transportation Engineering

- Civil Engineering – Materials and Diagnostics of Constructions
- Civil Engineering – Project Management
- Civil Engineering – Water Management and Water Structures
- Civil Engineering – Environment
- Construction Management and Economics
- Integral Safety of Constructions
- Building Engineering – Preparation, Erection and Operation of Constructions
- Buildings and Environment/Budovy a prostředí
- Intelligent Buildings
- Geodesy and Cartography
- Civil Engineering
- Buildings and Environment
- Water and Environmental Engineering:

40 points from the entrance examination (max. possible number of points being 100).

b. In the study programme of

- Architecture and Building Sciences:

20 points from the oral part of the examination (max. possible number of points being 50),

20 points from the written part of the examination (max. possible number of points being 50).

3.2. Total numbers of points in the admissions proceedings:

a. In the study programmes of

- Civil Engineering – Buildings
- Civil Engineering – Structural and Transportation Engineering
- Civil Engineering – Materials and Diagnostics of Constructions
- Civil Engineering – Project Management
- Civil Engineering – Water Management and Water Structures
- Civil Engineering – Environment
- Construction Management and Economics
- Integral Safety of Constructions
- Building Engineering – Preparation, Erection and Operation of Constructions
- Buildings and Environment/Budovy a prostředí
- Intelligent Buildings

- Geodesy and Cartography
- Civil Engineering
- Buildings and Environment
- Water and Environmental Engineering

the total number of points in the admissions proceedings is calculated as

25 % of the results of the entrance examination (max. 100 points)

and 75% of the study results obtained in Bachelor's degree studies (max. 300 points).

The results of Bachelor's degree studies are calculated as the study weighted average of all courses considered with a weight of 0.8 and the mark for the Bachelor's thesis defence considered with a weight of 0.2.

The total number of points obtained in the admissions proceedings (max. 400 points) is calculated from the formula:

$$Z + 3 (0.8 \cdot P + 0.2 \cdot B)$$

Z is the number of points from the entrance examination,

P is the point evaluation of the study weighted average of all courses completed in Bachelor's degree studies (specified pursuant to Art. 3 para. 3.3),

B is the point evaluation of the mark for the Bachelor's thesis defence (specified pursuant to Art. 3 para. 3.3).

b. In the study programme of

- Architecture and Building Sciences

the total number of points in the admissions proceedings is calculated as

25 % of the results of the entrance examination (max. 100 points)

and 75% of the study results obtained in Bachelor's degree studies (max. 300 points).

The results of Bachelor's degree studies are calculated as the study weighted average of "Studio" courses considered with a weight of 0.5, the study weighted average of all courses considered with a weight of 0.3 and the mark for the Bachelor's thesis defence considered with a weight of 0.2.

The total number of points obtained in the admissions proceedings (max. 400 points) is calculated from the formula:

$$Z + 3 (0.5 \cdot A + 0.3 \cdot P + 0.2 \cdot B)$$

Z is the number of points from the entrance examination,

A is the point evaluation of the study weighted average of "Studio" courses completed in Bachelor's degree studies (specified pursuant to Art. 3 para. 3.3),

P is the point evaluation of the study weighted average of all courses completed in Bachelor's degree study (specified pursuant to Art. 3 para 3.3),

B is the point evaluation of the mark for the Bachelor's thesis defence (specified pursuant to Art. 3 para. 3.3).

3.3. The study weighted average is identified pursuant to Art. 12 of the [Study and Examination Rules for Students of CTU in Prague](#) as amended. If some other university does not use a credit system, the course weight is given by the number of its teaching units per week.

The study weighted average is recalculated into point evaluation using the formula:

$(125 - 25 \cdot PR)$, where PR is the respective study weighted average expressed using two decimal places.

The marks for individual parts of the final graduation examination and the resulting mark are recalculated into the point evaluation as follows:

A (excellent)	100	points;
B (very good)	87.5	points;
C (good)	75	points;
D (acceptable)	62.5	points;
E (satisfactory)	50	points.

5.2. In the [Dean's Directive](#), the Dean may condition the opening of some study programmes or specializations by minimum numbers of students registered for study in these study programmes or specializations.

5.3. The Dean may increase the maximum numbers of students admitted to study in individual study programmes or specializations specified in Art. 5 para. 5.1, based on the numbers of candidates applying for individual study programmes or specializations.

Art. 6 Allowing passing the entrance examination on-line

6.1. Based on a written application, the Dean may allow taking the entrance examination in the on-line format to foreign nationals (excluding applicants from the Slovak Republic) who apply for study in the study programmes of Civil Engineering, Buildings and Environment and Water and Environmental Engineering and certify their corresponding knowledge of English pursuant to Art. 1 para. 1.1 letter f) in their application.

Art. 7 Additional provisions

- 7.1. The course of the admissions proceedings, including the dates of entrance examinations, is regulated by the [Dean's Directive](#).
- 7.2. If special University authorizations under emergency situations pursuant to §95a - §95d of Act No. 111/1998 Coll. on Higher Education Institutions or another exceptional Government measure apply at the time of the on-going admissions proceedings, the Dean may modify the announced dates of the admissions proceedings or the conditions of the admissions proceedings. The application of this article is at the Dean's discretion depending on the current situation. The modified conditions will be issued as a separate Dean's Order and will be approved by the FCE Academic Senate.
- 7.3. FCE does not accept applications from the applicants who were expelled from study at FCE CTU in a disciplinary proceeding under Art. 2 of the Disciplinary Code for the Students of CTU in Prague, or who terminated their study by withdrawing from study during an opened disciplinary proceeding, or who cheated during their previous admissions proceedings to FCE.
- 7.4. The applicants who cheat during the admissions proceedings will not be admitted to study at FCE. The decision whether an applicant cheated is at the Dean's discretion.

Art. 8 Effect

- 8.1. This order comes into effect on the date of its announcement.
- 8.2. These conditions were approved by the FCE Academic Senate on 1. 11. 2023.

prof. Ing. Jiří Máca, CSc., m.p.
Dean
